

Business Solutions with Generative AI Competition

Sponsored by: Ferris State University

Competition Overview and Components

In this fast-paced, two-hour competition, students will tackle a problem set unveiled at the start, leveraging generative AI to develop an innovative solution. Teams will utilize AI tools to generate a completed project during the competition. After the competition, final submissions will be showcased for an hour, allowing conference attendees to review and vote on the best solutions. This challenge fosters collaboration, problem-solving, and real-world AI application in a dynamic, engaging environment.

Team Composition

The competition can be an individual effort or the work of a team of two.

Skills

Teams will utilize AI tools

Scoring

Your finished product will be judged by both the team who created the challenge as well as your peers during the presentation of your finished product during the Generative AI presentations beginning at 3:30 on Saturday.

Schedule

See Competition Schedule for Competition time and place. The time will include Competition overview, Competition work and turn in. Check in will begin 15 minutes before the Competition begins.

Resources

Each student should bring their laptop with AI development tools.
