Competition Overview and Components

The SAP competition is a challenge for students using a simulation designed so that a student with some ERP/SAP skills can succeed. There are suggested resources available below, under 'Resources'.

The software used for this competition is ScrimmageSIM.

This competition is a progressive set of tasks to be completed by teams of 1-2 students.

Team Composition

Individuals or teams of 2 students can register for this competition.

Skills

Previous ERP/SAP skills will be helpful. The ERP ScrimmageSIM Workshop is a great introduction and prerequisite for this competition. Reading about ScrimmageSIM is strongly suggested also.

The main skills for Students wishing to be successful is that they have an inquisitive nature and a drive to succeed.

Scoring

Points will be given for successful and correct completion of challenges. In case of a tie, the winners' partial, incomplete, or incorrect submissions will be analyzed and partial points will be given for attempted but incorrect challenges. Grading will be done by a judge with experience grading the ScrimmageSIM challenge.

In the event of multiple students completing the entire competition 100% correctly, the student to complete the competition first will be given first place.

Schedule

See competition schedule for competition time and place. The time will include competition overview, competition work and turn in.

Check in will begin 20 minutes before the competition begins.

Resources

Each team must have at least 1 computer to complete your project. Learn about ScrimmageSIM at <https://scrimimagesim.com> . All other resources will be provided at the beginning of the competition time.
