

Business Solutions with AI Tools Workshop

Sponsored by **Overtime Global**

Workshop Overview and Components

This workshop introduces college students to a *variety of AI tools* that streamline IT tasks, from automating code generation to troubleshooting and documentation. Participants will explore practical applications, learn prompt engineering techniques, and gain hands-on experience using AI to boost productivity in system administration, cybersecurity, and software development.

Skills

No previous skills are required for this workshop.

Schedule

See the conference schedule for workshop time and place. The time will *include overview of the AI tools*.

Resources

Each participant should have a computer to practice the techniques taught in this workshop.
